

Mission Statement:

The mission of the Caroline Christian Health Center (CCHC) is to improve the quality of life for the residents of Caroline and surrounding counties by providing state of the art medical care, as well as access to health education material; compassionate Christian-based counseling services and local Christian outreach ministries.

Description of Services:

Medical

CCHC will provide all typical primary care services for both pediatric and adult residents. This will include, but will not be limited to acute care for minor injuries and illness, management of chronic disease and other ongoing health problems, provision of recommended immunizations (both child and adult), well child examinations, well woman examinations, well man examinations, child and adult health screening services, prenatal care for routine (non-high risk) pregnancies. CCHC will also develop a mobile unit that will serve to bring critical health screening services and immunizations as well as some disease management services to many of the outlying and remote communities of Caroline county. Other possible uses for this particular venue include mobile dental, optometry and podiatric services.

Education

Providing accurate and timely health information to our clients is a critical part of the mission of the CCHC. This will be done through a variety of means, including printed materials, computer based learning, and personal instruction.

Counseling

The CCHC will have on staff a full-time family counselor. He or she will provide Christian based counseling services for the entire family, when indicated. Referrals will be primarily from within the CCHC, but not exclusive.

Spiritual

An important part of the mission of the CCHC is to provide access to local Christian ministries who are directly interacting with the residents of Caroline county and who are providing assistance, consistent with purpose and mission of the clinic. The CCHC will partner with these ministries through referrals and word of mouth.
